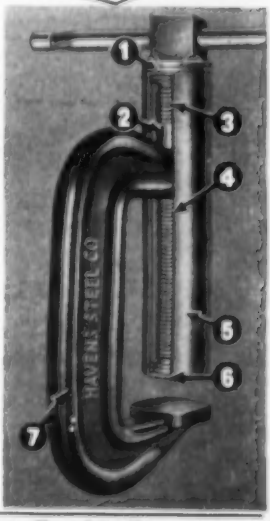
Call Scully for HAVENS Protected "C" CLAMPS

Welding shops will find Havens Clamp more than satisfactory. The shield protects the threads from weld spatter and prevents clogging of the screw. Look at these important features:

1. Phosphor Bronze Bearing insures easy turning.
2. Long guide keeps compression sleeve always in alignment.
3. Screw above top is always in tension — prevents bending of screw.
4. The screw never takes any stress below the top of the clamp. It cannot buckle or bend.
5. Strong compression sleeve protects threads from damage.
6. The end cannot turn — it prevents "walking."
7. High tensile strength — it will stand abuse.

Havens Protected "C" Clamps are available in a large assortment of sizes from any one of the eight Scully warehouses. And, of course, with prompt Scully Service, as usual. *Write for Free Stock List and Reference Book.*



For STEEL, STEEL PRODUCTS, COPPER, BRASS, TOOLS, EQUIPMENT, MACHINERY "*Call Scully*"
